

# DURING & AFTER COVID 19

## A NEW, UNPRECEDENTED REALITY

COVID 19 has forced the world to social distance, or isolate, from friends and family. This can be difficult for those of us without a mental health condition; for the nearly **6.3 million children aged 3-17 with diagnosed depression and anxiety** and the millions more who haven't been formally diagnosed but are still impacted by symptoms, this can be extremely trying, even dangerous.

## KNOWING THE SIGNS OF MENTAL HEALTH DISTRESS IN YOUTH IS ESSENTIAL TO SUPPORTING YOUR CHILD

\*Not an exhaustive list of mental health distress signs.

Extreme mood changes, such as sadness, irritability, anger or excessive clinginess

Excessive worrying or fear

Changes in sleeping or eating habits

Multiple physical ailments without obvious causes

Suicidal thoughts

Inability to handle daily activities, problems or stressors

## TIPS FOR MANAGING

**STICK WITH THE FACTS**

**STAY CONNECTED**

**ESTABLISH ROUTINE**

**GET OUTSIDE**

**FOCUS ON THE POSITIVE**

## LONG TERM MENTAL HEALTH: BLUE REFUGE VICTORY METHODOLOGY
