

NICOLE CLARKE

Manager, East Region **Tank Industry Consultants**

Education: B.S., Business Administration, Clarion University of Pennsylvania

Industry Activities: American Water Works Association (AWWA)

Years of Tank Experience: 5

As Manager of Tank Industry Consultants' East Region, Nicole Clarke serves as client liaison in the development and execution of tank rehabilitation and new tank construction projects throughout the eastern portion of the United States. In her 6 years at TIC, Nicole has been involved in *more than 800 tank engineering and inspection projects*. Her responsibilities include project management to help assure smooth-running, quality projects that are on schedule and within budget, and to troubleshoot potential problems quickly in order to achieve solutions that are in the best interest of Tank Industry Consultants' clients. Nicole organizes and attends pre-bid meetings, and investigates, contracts, and coordinates the work of subconsultants on the projects she manages. Since joining TIC, Nicole has been actively involved in tank evaluation, rehabilitation, and new tank construction projects for a number of east coast clients including four of the largest American Water subsidiaries, and several large eastern US water systems. The projects have included:

- Drained Tank Evaluations
- ROV Tank Evaluations
- Dive Evaluations
- Ultrasonic Thickness Testing
- Preparation of Detailed Technical Specifications and Designs
- Bid Assistance
- Attendance at Pre-Construction and Project Kick-Off Meetings
- Contract Administration
- Observation of the Contractor's Work
- New Tank Design and Construction

Nicole works closely with TIC's engineering and field services departments to assure the successful completion of all projects assigned to her.

Prior to joining Tank Industry Consultants, Nicole was Senior Account Representative for Liberty Mutual Group and for five years was on the staff of SSPC: The Society for Protective Coatings.
