COVID-19 Vaccinations: Those most at risk get it first.

A tested, safe and effective vaccine will be available to all who want it, but supplies will be limited at first. Independent state and federal public health advisory committees have determined that the best way to fight COVID-19 is to start first with vaccinations for those most at risk, reaching more people as the vaccine supply increases from January to June. Keep practicing the 3W's—wear a mask, wait six feet apart, wash your hands—until everyone has a chance to vaccinate.

Every health care worker at high risk for exposure to COVID-19—doctors, nurses, and all who interact and care for patients with COVID-19, including those who clean areas used by patients, and those giving vaccines to these workers

Long-Term Care staff and residents—people in skilled nursing facilities and in adult family and group homes

Adults with two or more chronic conditions that put them at risk of severe illness as defined by the CDC, including conditions like cancer, COPD, serious heart conditions, sickle cell disease and Type 2 diabetes, among others

Adults at high risk of exposure including essential frontline workers (police, food processing, teachers), health care workers, and those living in prisons, homeless shelters, migrant and fishery housing, with 2+ chronic conditions

Those working in prisons, jails, and homeless shelters (no chronic conditions requirement)

Essential frontline workers, health care workers, and those living in prisons, homeless shelters or migrant and fishery housing

Adults 65+

Adults under 65 with one chronic condition that puts them at risk of severe illness as defined by the CDC

College and university students

K-12 students when there is an approved vaccine for children

Those employed in jobs that are critical to society and at lower risk of exposure

DE CE 1006 R 8 2020

CHOOSE TO GET VACCINATED

PROTECT yourself, your family, your community, and help end the pandemic.

1. The vaccine will offer additional protection from COVID-19.
2. When entire communities get vaccinated, wear masks, social distance, avoid large gatherings, and wash their hands we'll have the best chance of ending the pandemic.
3. Initial vaccine quantities will be limited. Talk with your healthcare provider or local Medical Treatment Facility for more details about when vaccine will become available.

The vaccines available for COVID-19 have been proven safe and effective, are authorized by the U.S. Food and Drug Administration, and are being manufactured and distributed safely and securely.
