Years of Experience: 35

Rich Racy joined Tank Industry Consultants after more than twenty years in the coating industry. He has extensive experience in coatings removal and application, and lead-paint abatement. His experience in job-site record keeping, safety, and crew management are invaluable in his work at TIC.

As Director of Work in Process, Rich supervises and dispatches all TIC construction inspection technicians. He organizes and schedules all construction phase inspection job assignments and manages the quality of all work-in-process observation activities. Field technicians assigned to monitor the contractor's work communicate regularly with Rich who helps resolve any conflicts or deficiencies in the contractor's work. Rich's job responsibilities include:

- Understand Individual Project Requirements
- Schedule Appropriate Field Technicians to Projects
- Monitor Reports and Documentation from Field Technicians
- Verify Technician Has Necessary Information to Perform Job
- Responsible for Quality of Field Work
- Audit Jobs for Proper Paperwork

Rich is one of the primary liaisons between TIC, tank owners, and contractors.
